

DeLaval VMS™ Series

A System Approach

**IT ALL REVOLVES
AROUND YOU**

 **DeLaval**

DeLaval VMS™ Series

VMS™ V300

Vera's milking system

With two models available, the DeLaval VMS Series gives you options to create the voluntary milking system that best matches your needs and farming style. Both the VMS V300 and VMS V310 feature the core functionality that helps to ensure your cows are milked to their full potential.

VMS™ V310

Christian's milking system

With the VMS V310 that productivity advantage is extended to the next generation of cows as well, with Progesterone based sampling and analysis adding full pregnancy and heat detection to the list of tasks these amazing systems are capable of completing automatically.

Reproduction
Management

"The biggest impact on the cows has been on the production level."

Data collected on test and pilot farms.

"Before we used ultrasound, now RePro tells us they're pregnant."

DeLaval InControl™

Monitor and control your DeLaval VMS™ milking system and your cows.

DeLaval Advisory

DeLaval advisory and planning teams are available to help you assess the suitability of a Voluntary Milking System for your situation, and to help you figure out how DeLaval VMS Series will help deliver you a better bottom line.

We take a
360° view
of your
farm

DeLaval PureFlow™

It all starts with preparation - DeLaval PureFlow doesn't just clean udders, it prepares them, while using the exclusive transparent cup that allows you to see it in action.

The start of the most gentle and effective milking process we've ever created.

DeLaval VMS™ Series
