

“ As the new DeLaval robot collector can handle all my floor types I saved a lot of money investing in this robot. Otherwise I would have needed to invest in two separate systems. ”

— Samuel Eskilsson

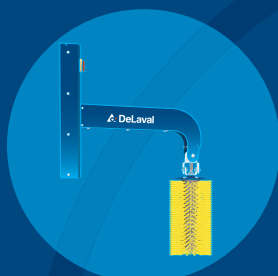

FARM LOCATION: ÖDESTUGU,
TENHULT, SWEDEN

HERD SIZE: 60 COWS

DeLaval robot collector works well with:

DeLaval Cow Comfort

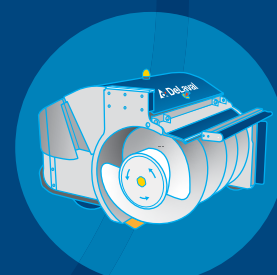

DeLaval InService™

DeLaval VMS™ Series

DeLaval Conventional
Milking systems

DeLaval OptiDuo™

At DeLaval, we strive to help you deliver high quality milk, from healthy animals.

That's why we don't just focus on one part of the milking process. We design, manufacture, install and maintain whole systems, and we ensure the quality and reliability of every component of those systems.

Put DeLaval robot collector to work for you.

DeLaval robot collector

RC550 & RC700 manure robot for solid floors

We ♥ hooves.

While the DeLaval robot collector works around the clock to collect and remove manure from right under your cows' feet, you can be sure that you are doing the best job you can to manage their hoof health, even while you're sleeping.

We ♥

working smarter.

Whatever flooring you use, a DeLaval robot collector doesn't just scrape - It will clean and collect most types of manure to deliver a clean environment and healthy hooves.

reaching places others can't.

The DeLaval robot collector gets into the corners that scrapers can't, so you can say goodbye to your shovel, and say hello to a clean, healthy barn.

keeping your cows happy.

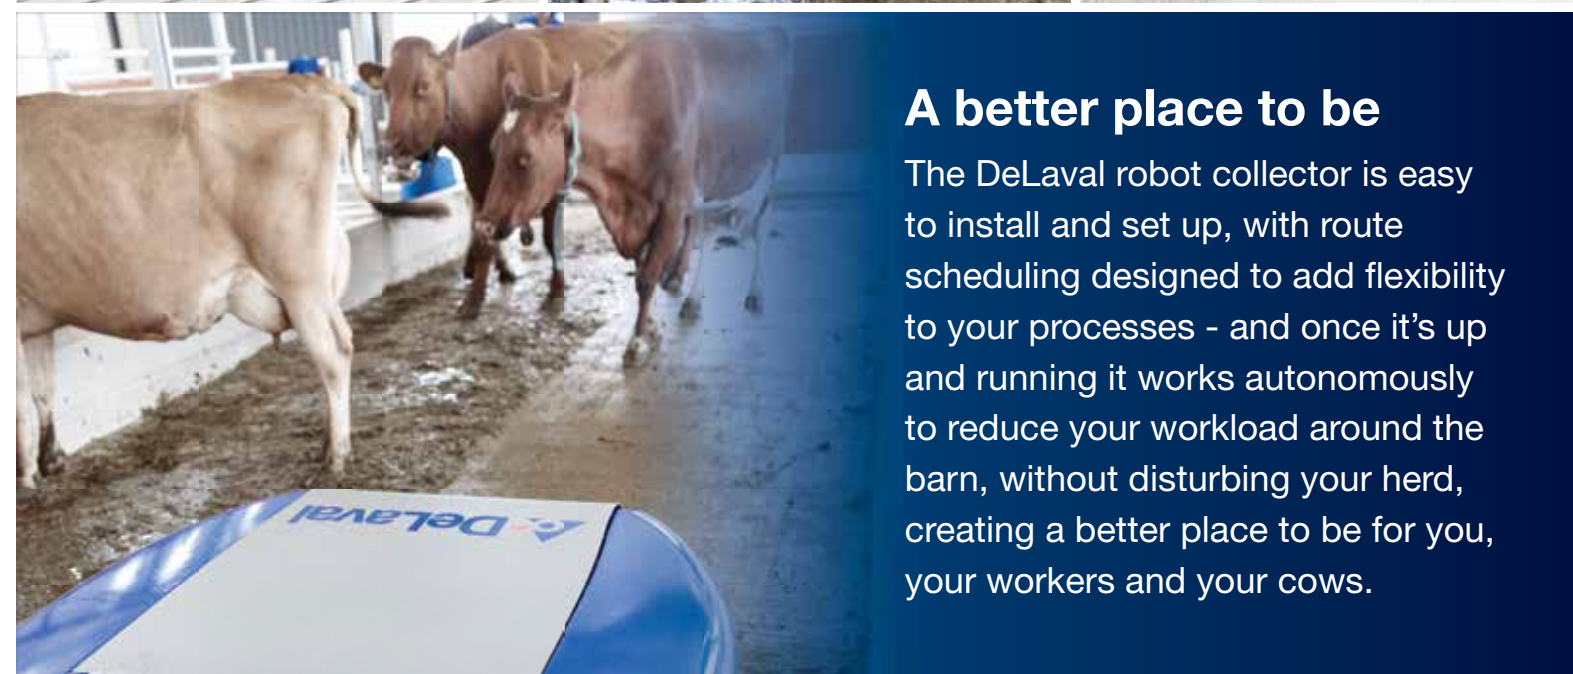

With a cow friendly motion, low speed and range of movements, your cows will love the DeLaval robot collector - and you'll love having a healthy, productive herd.

giving you flexibility.

The robot collector can be programmed to any route you can imagine, on most types of floors, so you can build a manure system that fits your barn - and not the other way around.

doing more with less.

The DeLaval robot collector not only collects more types of manure than many other manure systems, but because it isn't adding unnecessary water, more manure is collected between disposals, giving you a higher capacity.

A better place to be

The DeLaval robot collector is easy to install and set up, with route scheduling designed to add flexibility to your processes - and once it's up and running it works autonomously to reduce your workload around the barn, without disturbing your herd, creating a better place to be for you, your workers and your cows.

Taking a 360° view of your farm with DeLaval robot collector

Farm Profitability

A clean barn not only contributes to lower instances of mastitis and higher milk quality but also faster milking times because of faster teat preparation.

Work Efficiency

Cleaning areas that conventional scrapers can't reach means you can put down the shovel and focus on what's really important.

Animal Welfare

Poor hoof condition is the leading cause of lameness and premature culling. With the DeLaval robot collector, autonomous cleaning cycles help to ensure a clean and comfortable environment for your cows, for clean animals and improved longevity.

Food Safety

A clean environment for your cows means clean udders and clean hooves - improving both your herds' wellbeing and milk quality, by directly reducing somatic cell counts and cases of mastitis.

DeLaval robot collector

The cow friendly solution

With its silent motor and low speed you can be sure you have a solution for clean floors and healthy cows that won't disrupt your herd.

Cleaning where others can't

The robot collector can even clean tight corners, effortlessly removing all manure types and handling most bedding materials.

Don't add water

Unlike some manure solutions, the robot collector doesn't need to add water, which means more manure is collected between disposals.

DeLaval InService™

Service and maintenance can be covered with a performance plan that ensures your robot will keep cleaning at the level you demanded when you purchased it.
