

DeLaval
Swinging beef
brush

The brush that goes the distance

Our best swinging cow brush – adapted for beef cattle

We've adapted our best-selling dairy cow brush to meet the needs of beef cattle. Retaining all the features dairy farmers love—automatic safety features, long-lasting bristles, including the patented cylinder and dual-pivot design—our new swinging brush is our most robust yet, perfect for use with long-haired and large-horned animals.

- ✓ Robust construction
- ✓ High quality materials
- ✓ Smart safety features
- ✓ Low energy consumption*

*0.12kWh

Taking a 360° view of your farm with the DeLaval swinging beef brush

Farm profitability

A DeLaval swinging brush removes ticks and other parasites, helping to reduce veterinary costs. Additionally, it protects your farm equipment from damage caused by animals using it for scratching.

Work efficiency

Our brushes are designed and tested to withstand harsh conditions and frequent use. Their high durability ensures consistent performance day in and day out with minimal maintenance.

Animal welfare

Cows love the patented dual-pivoting motion of our swinging brush, which allows them to reach places other brushes can't. Your cows will be cleaner, more relaxed, and less likely to injure themselves by scratching against farm equipment.

Food safety

Our swinging cow brushes have been proven to reduce cases of clinical mastitis. Additionally, regular massaging can lead to improved meat quality due to increased intramuscular fat.

- ✓ Robust construction for maximum durability
- ✓ Provides stress relief and muscle massage
- ✓ Intelligent safety features
- ✓ Energy-efficient operation
- ✓ Adjustable height
