

DeLaval Teat First

Specialist
Formulations
for Superior
Udder Health

Udder health is critical for the performance of your herd and the profitability of your farm.

That's why DeLaval is committed to the supply of innovative and reliable products that help you control the spread of mastitis-causing pathogens whilst maintaining the health and productivity of each and every teat.

A Range to Support Your Challenges.

From pre-milking to post-milking - our range of teat dips, sprays, foams and soaps - have been developed to help you maintain the performance of your herd, no matter where you are in the world.

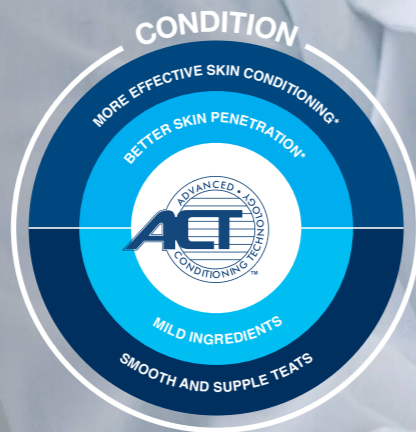

Are you milking in a parallel parlour, a 40-bail rotary or with an Automated Milkings System? No matter what you milk with, DeLaval has the right product to help you improve the udder health of your herd and by doing so, prolong the productive lifetime of your cows. If you prefer to dip or spray, clean or disinfect, condition or defend, ...we've got you covered!

Our Exclusive Technologies.

Innovation is key to DeLaval, that's why big investments are being made every year into the Research and Development of new innovations that help control the spread of bacteria causing mastitis and bring animal health and milk quality to the next level.

DeLaval teat dips are developed by our own R&D team, containing innovative and often patented technologies like shown below. Before launched on the market, they have been thoroughly tested, in vitro but also in vivo, through several strictly monitored on-farm trials. Our team of experts monitor efficacy, teat conditioning properties, milking performance, ease of application, sprayability, compatibility, etc.

Teat Products You Can Trust.

Our purpose built manufacturing facilities ensure our strict quality control standards deliver products that you can trust.

Our good manufacturing practice (GMP) is a quality assurance system that covers manufacturing, control and quality procedures. GMP covers all aspects of production from construction, technical data, technology, suppliers' requirements and personal staff through to the production process (methods, practices, etc), storage and distribution of the product.

DeLaval NV, division DeLaval Chemicals, specialises in the production of disinfecting chemicals, udder soaps and pre-impregnated udder towels. It is under strict supervision of an industrial pharmacist and pharmaceutical inspection of the Belgian Ministry of Public Health. DeLaval NV, division DeLaval Chemicals is ISO 9001, ISO 14001 and GMP certified.

Pre-milking Products

A good pre-milking or udder preparation routine improves milk letdown, helps prevent the spread of contagious bacteria, and helps keep teats healthy and in good condition. DeLaval has a wide range of products, suitable for any type of pre-milking routine.

PRE-MILKING SOAPS

Biofoam Plus
Biofoam Plus puts the PLUS in cleaning and removes dirt very efficiently. The rich foam of Biofoam Plus will cover the full teat, easily detaching dirt and keeping the skin soft and smooth.

Hamra Soap
Hamra Soap is a highly concentrated udder soap, both efficient and economical in use. The mix of emollients and skin neutral pH help to keep the teat smooth and soft.

DeLaval Robotics Teat Cleaner
Concentrated liquid soap for pre-milking teat cleaning in automatic cleaning devices and specially adapted to the VMS V300 series DeLaval PureFlow™ system.

OceanBlu spray*
OceanBlu spray is the latest innovation in pre-milking disinfection and can be used as a foam or spray.

DISINFECTANT

UDDER PAPER

Softcel
Softcel is a premium tissue towel for pre-milking cleaning of teats and udder. Available in 2 layer or 3 layer.

Biocell
Biocell is a unique combination of cleaning power and harmonious and soft care for the teat skin.

Drycel
Drycel is a very resistant pure cellulose paper that needs to be soaked in a soap solution before cleaning the teats.

Eco paper
DeLaval eco paper is a 100% ecological food-grade paper, that is strong and resistant.

UDDER TOWELS

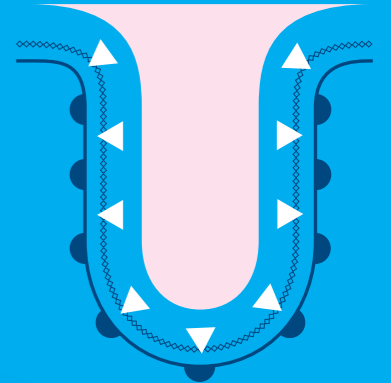

DeLaval has a wide assortment of udder towels available, from microfiber to cotton, from knitted to woven. Which one do you prefer?

Post-milking solutions to suit your herd's needs.

3 FOCUS AREAS OF TEAT CARE

- Attack** Putting the bacteria killing power in the right place, at the right strength, for longer.
- Condition** Helping to ensure that teat condition is not compromised, as it is the best protection against future infections.
- Defend** Getting between the environment and the teat.

Our dip and spray range

A good udder preparation and milking routine, combined with post milking teat dipping/spraying, has a proven impact on reducing mastitis. Our range of high quality teat dips will keep teats in excellent condition.

After all, a teat skin in good condition is the first barrier against mastitis pathogens. Studies show (Van Soest et al. 2016) that average cost of mastitis can quickly rise up to 240€ per cow per year, through a combination of preventive costs but also production losses and treatment costs. A good pre- and post-milking routine will therefore quickly pay off!

ATTACK ▲

Tri-Fender™

- Excellent disinfection because of I-tech
- Great teat conditioning because of ACT and skin-neutral pH
- Specifically designed for automated spraying

Prima Plus

- Excellent sprayability; designed for use in automatic spraying systems
- Friendly to teat skin
- Low residue profile

Proactive™

- Great teat disinfection
- Superior teat conditioning
- Excellent sprayability

Iobac concentrate

- Teat dip/spray containing 1500 ppm iodine in ready to use solution
- Excellent disinfecting properties
- Formulated with pH close to teat skin
- Concentrated iodine based teat dip/spray 1+4 dilution rate

Iobac RTU

- Teat dip/spray containing 1500 ppm iodine
- Excellent disinfecting properties
- Formulated with pH close to teat skin
- Ready to use product

Bovidip™ Conc

- Good skin conditioning
- Good disinfection properties
- Concentrated iodine solution

DEFEND ◐

Blockade™

- Excellent teat disinfection for protection between milkings
- Superior teat conditioning
- Low drip, cost effective teat dip

CONDITION ◊◊◊

FormaShield™

- Concentrated liquid teat disinfectant
- Can be applied pre- and post-milking
- High level of glycerine for very good skin conditioning
- Cost-effective sprayable product

Hamra Red

- Extra teat conditioning properties
- Very suitable (automated) spraying

Introducing OceanBlu™

OceanBlu™ spray

- Pre- and post-milking, fast & effective, disinfection in one product
- Optimized blend of emollients and surfactants
- Perfect to spray and foam!

OceanBlu™ barrier

- Long-lasting, high-quality, persistent barrier protection
- Good teat coverage and skin penetration
- Distinctive bright blue colour

Udder Care Products

Aside from a wide assortment of pre- and post-milking products, DeLaval also offers a range of different type of udder care products.

A good performance and udder health requires a holistic and multifactorial approach, therefore aspects like good milking routines, bedding hygiene and barn environment also need to be carefully looked at.

UDDER CREAMS

Udder creams

Assortment of highly conditioning udder creams, with added properties where needed.

sMOOth care

Rich teat fat with a feeling cows love. Mild pharma-grade ingredients are used to give the best protection in harsh conditions.

DIAGNOSTIC TOOLS

Visual diagnostics

Check the milk quality before attach, by using diagnostic tools like a CMT test and a strip cup.

Cell Count reader

With DCC and OCC you can confidently know your herd's udder health by accurate SCC measurements.

More products to improve the milking experience for you and your cows.

DryMaxx

Bedding treatment for a hygienic and dry resting place for cows. Has ammonia neutralizing properties and high moisture absorption.

DeLaval PeraDis*

PeraDis is a liquid concentrated disinfectant to be used as milking and cooling equipment disinfectant. Safe and easy to apply.

Hand cleaner

A fresh almond fragrance with ingredients mild to skin. Suitable for frequent use. Perfectly cleans heavily soiled hands.

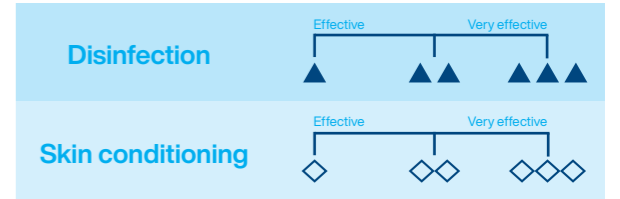

Gloves & Aprons

DeLaval provides a complete range of protective overalls, aprons, trousers, shirts, sleeves and gloves. Our comfortable, lined and practical gloves protect your hands by withstanding all alkali and acid-based detergents. Our aprons are made of waterproof PVC and stays flexible and comfortable even in cold conditions.

The right product to get results

Depending on your farm need and the desired application type, DeLaval has a wide range of pre- and post-milking products to choose from;
