

“Cows walk in, cows have their own space, cows are comfortable and cows milk quick. We are very happy with this setup.”

— Billy O'Connor

FARM LOCATION: COUNTY KERRY, IRELAND
NUMBER OF MILKING COWS: 210

“Milk production improved more than **10%**

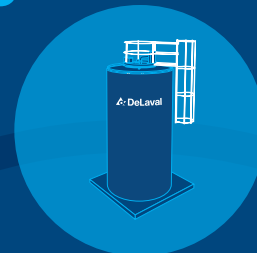

with the same amount of cows and that is proving our investment into the new milking system.*

DeLaval Parlour milking system P100

IT ALL REVOLVES AROUND YOU

 DeLaval

 DeLaval

The easy way to milk

With the DeLaval P100 we've created a parlour that is not only easy to operate, but easy to plan and install, easy to maintain, and importantly – easy on the pocket.

If you're looking for flexibility, as well as the latest in milking technology, we're sure there's a P100 to suit your plans.

Straight rump rail or specially designed butt pan with gutter options

Suspended sequence gates and adjustable breastrail for better farm operation

Ideal solution for **MidiLine farms**

Up to **45%*** less surface to be cleaned

Reduce milking time*

Modular design **easy to fit** your space

Perfect parlour for retrofit farms

Cow and milker **comfort**

Space saving conventional exit

* Compared to parallel parlour with fast exit

DeLaval does not claim that these results are typical and this information does not constitute a warranty nor guarantee of service. Actual performance and improvement will depend on a number of factors, including prior milking practices, type of cows, farm and herd maintenance practices.

Wherever you farm, whatever your management routines are and how many cows you would like to milk – the central challenges you face are the same: How do I maximize milk yield and quality while minimizing the time it takes, and the costs associated with harvesting milk?

DeLaval Parlour P100 has been specially designed for our family farms and our grassland customers. With the new DeLaval Parlour P100 we are able to deliver a smooth milking process. It doesn't matter if you would like to milk in a double-equipped low-line system or in a swing-over parlour, with stand alone or DelPro system connection - we've set out to make a safe, calm, fast, easy and productive place for your cows and your workers.

- ✓ Flexible solution
- ✓ DelPro connected
- ✓ System design, planning and advice
- ✓ Service is included

Taking a 360° view of your farm with with DeLaval P100

Farm Profitability

The small footprint and simple components of a DeLaval P100 make installation quick and easy, and when compared to other new parlour installations, relatively inexpensive. The P100 also requires little water to clean, and a low manure storage capacity, so you can keep operating costs low.

Work Efficiency

Compatible with the latest in vacuum, pulsation and cluster technology, the P100 can help you unlock shorter milking times and efficient routines for milkers - making your daily milking easy.

Animal Welfare

Cows move quickly and smoothly through the P100, and with clearly defined spaces for each cow they always know where to go. Also, cleaning the P100 is quick and easy so you can manage hoof health and hygiene with ease.

Food Safety

Being easy to clean, the P100 makes it simple to keep your cows free from the bacteria that increase somatic cell counts, cause mastitis and contaminate your milk yield.

It's just easy with a P100

The DeLaval Parlour P100 has been designed to do more on a smaller footprint, using less resources and more technology, making it the right choice for farms who would like to milk the easy way.

DeLaval EasyMilk™

Whether you're looking for a swing over or a double, the P100 is optimised for ease of operation and milker comfort with its wide alley, comfortable milking position, specially designed butt pan and high visibility from the pit.

Compatible with state-of-the-art DeLaval Evanza™ clusters, system connected InParlour Feeding and DeLaval Flow-Responsive™ Milking your P100 can help you extract more milk, in less time whilst unlocking more efficient, less stressful routines for milkers.

DeLaval Evanza™ Clusters

High visibility

InParlour Feeding

DeLaval EasyFit™

DeLaval P100 parlours are modular and able to fit into the footprint of your existing barn or new build. With 1x3 to 2x40 options, designing a P100 to fit your space is easy. Speed up your milking time and make life easy in your brand new or retrofitted milking environment.

Modular design – 1x3 to 2x40 sizes available

DeLaval EasyFlow™

Featuring a wide entry and double exit, cows move smoothly through the P100, and with its adjustable breastrail and sequence gates clearly defining the space for each cow, parlour loading is seamless, so your cows stay comfortable and relaxed.
